Professional Summary

Planning Analyst focused on data, BI and automation, working across the full cycle: extracting data from the ERP (Protheus/TOTVS), transforming it with Python and Power Query, modeling in DAX, and delivering it through dashboards, apps and web pages. Helped build the BI foundation for the Supply Chain team, replacing manual Excel controls with dashboards used daily by Sales, Logistics and Planning.

I combine a technical background (Information Systems student) with more than 4 years of hands-on experience in logistics, risk management and shipping operations, which lets me turn business problems into data solutions. I use AI in my daily work to speed up analysis and development, always validating the results.

Technical Skills

BI and visualization: Power BI, DAX, Power Query, dimensional modeling, advanced Excel

Data and programming: SQL, Python (automation and ETL), querying database views and relational databases (incl. Oracle)

Development: Power Apps, SharePoint, HTML, CSS, JavaScript, Java, C

Systems: Protheus/TOTVS ERP, Autotrac (fleet tracking)

Business: demand planning, forecast accuracy, order backlog, billing, inventory, raw material coverage, sales funnel, logistics

Methods: Agile methodologies, AI applied to analysis and development

Professional Experience

Grupo Agronelli · Uberaba, MG, Brazil

Planning Analyst · Dec 2025 – Present

- Helped build the BI foundation for the Supply Chain team, developing dashboards that turn data into decisions and replacing manual Excel controls.
- Automated the daily data pipeline (Protheus → Python → Power BI), eliminating manual consolidation that took up every morning (about 20 hours per week) and data searches that could take days.
- Built dashboards on top of the company's database views covering sales, billing, available backlog and inventory, raw material coverage and forecast accuracy, used by Sales, Logistics and Planning.
- Created business apps to digitize processes: a visit scheduler with geolocation check-in and a sales funnel for logging quotes (Sales team), plus a price list builder (Planning).
- Deliver end-to-end solutions, from database queries to dashboards, apps or web pages (HTML, CSS, JavaScript).

Shipping Assistant · Jun 2025 – Dec 2025

- Managed the drivers' operational flow at the shipping dock: screening based on the loading order, clearing trucks for loading and issuing invoices (NF-e) for departure.
- Promoted to Planning Analyst within 7 months.

Bravo Serviços Logísticos · Minas Gerais, Brazil

Tracking Operator · Jun 2021 – Jan 2025

- Monitored high-risk fleet operations carrying agrochemicals via Autotrac, owning each operation from trip setup to delivery.
- Configured tracking devices in the system before every trip, including signal mirroring to other tracking companies.
- Followed stops and signal losses in real time, contacting the police in risk situations such as theft or accidents.

Featured Projects

Automated data pipeline (Protheus → Python → Power BI). Daily ERP extraction, Python transformation and loading into the Power BI model, replacing manual spreadsheet consolidation.

Demand analysis and forecast accuracy. Dashboard comparing forecast vs. actuals and measuring forecast accuracy to support Supply Chain planning.

Business apps for Sales and Planning. Visit scheduler with geolocation check-in (Power Apps + SharePoint), sales funnel for logging quotes and a price list builder, replacing manual controls.

Operational dashboards on the database. Views of sales, billing, backlog, inventory and raw material coverage built directly on database views and delivered in Power BI and web pages.

Education and Languages

Bachelor's Degree in Information Systems · Uniube – University of Uberaba · expected Dec 2026

Languages: Portuguese (native) · English (intermediate)
